## 1. Introduction

This backup procedure describes all the risk cases related to the steps of the procedure XBID\_NEMO\_NOR\_01 and their relevant solutions.

The process concerned by this backup procedure is the transaction process, managed in the Shared Order Book (SOB) module, integrated in the XBID solution.

Capitalized terms used in this document shall have the meaning set forth in Annex 1, unless if defined differently in this document.

### 1.1. Purpose

As a general remark, the XBID backup procedures aim at offering a common framework to which all the local backup procedures must be aligned accordingly.

The purpose of this procedure is to provide the Operators with an overview of the applicable backup solutions in case of issues during the transaction process, which might jeopardize the Single IntraDay Coupling (SIDC).

The below mentioned backup solutions may be applied at any time when receiving information about the SOB.
