

UPDATE FROM NEMOs ON MCO
FUNCTION: ACHIEVEMENTS AND
NEXT STEPS

17/06/2019

ACHIEVEMENTS

Much has been achieved in the delivery of the MCO function as per CACM in the last 12 months:

- **Single Intraday Coupling first wave go-live in June 2018**
- **Approval and implementation of Terms, Conditions and Methodologies**
- **Delivery of first CACM cost report and agreement on the cost reporting criteria and process**
- **Agreement with TSOs on joint governance principles, structure and joint decisions on the R&D and requests for changes**
- **Agreement and signature of all operation and co-operation contracts mentioned in the MCO Plan**
- **Day-ahead operations running smoothly. Implementation of Euphemia 10.3 and technical go-live of Multi NEMO Arrangements**
- **EU-wide Intraday Auctions* proposal based on amended Algorithm Methodology now subject to public consultation until early July**
- **Transparency: website, workshop, reports...**

* Following ACER Decision on IDCZCP

Coming soon... further integration of EU power markets

- Full integration of 4MMC and MRC areas into the SDAC
 - Initial integration of both areas (except HR-HU and RO-BG borders) through NTC-based coupling;
 - Future implementation of CORE flow-based market coupling
- Extension of Single Intraday Coupling to 7 countries, 2nd go-live wave
- Implementation of IDAs
- Euphemia upgrade: extension of calculation time; R&D programme; algorithm performance
- Enhanced NEMOs-TSOs cooperation through implementation of joint governance principles

MCO governance:

- Ongoing process led by the EC to assess potential improvements in MCO function governance
- Extensive input provided by NEMOs on priority topics raised by the EC, including detailed overview of MCO function and planned improvements in the Day-Ahead Algorithm
- Technical requirements (flow-based, 15 mins, repeatability), → scalability, self-moderation, (R&D and roadmap)
