

4th Wave Go-Live Single Intraday Coupling (SIDC) Pre-launch Event

Dear Sir/Madam,

We are pleased to invite you to our important 4th Wave go-live Single Intraday Coupling (SIDC) pre-launch event, to be held on Thursday 29 September 2022.

The 4th Wave go-live is targeted for end of November 2022 (date to be confirmed) to enable the integration of Slovakia and Greece into the SIDC with the following borders: GR-BG, GR-IT, SK-HU, SK-CZ, SK-PL. We are currently undertaking internal testing activities for the 4th Wave and have planned preparation activities ahead of go-live. Member testing period will be also organised during the autumn.

Nominated Electricity Market Operators (NEMOs) and Transmission System Operators (TSOs) from 4th Wave go-live countries have arranged this pre-launch event to provide a comprehensive and informative opportunity to learn more about the SIDC (formerly XBID) solution and arrangements for the 4th Wave.

The pre-launch event is free of charge and will be held as a web conference.

It will include presentations covering an overview of the SIDC, borders/market areas/products, information from the Local Implementation Projects taking part in the 4th Wave and involvement of market parties in NEMOs' member testing and preparation.

We look forward to welcoming you to this interesting event. The registration link will be published in the beginning of September.

Yours faithfully
On behalf of the SIDC project parties

Jean Verseille and Stefano Alaimo
Co-chairs of the Steering Committee
