1. Introduction

As soon the PMB Gate Closure Time has been reached and the PMB has received all the Order Data and all the Network Data from all PMB Operators, the calculation will start automatically. Once the calculation is finished, the Coordinator's PMB will send the results to the other PMBs for the Preliminary Confirmation of the Results.

In case the Calculation is extended after the Time Limit [REDACTED] or if the Calculation cannot be performed due to validation or technical problems, the PMB Operators will apply the relevant backup solutions as described in this document.

1.1. Purpose

The purpose of this procedure is to describe the applicable backup solutions in case a problem occurs during one of the following stages:

- Validation of the Order Data or Network Data by the Algorithm;
- Market Coupling Calculation;
- Validation of the Results by the Algorithm.

1.2. Governed / Regulated by

All NEMO Day Ahead Operational Agreement

2. Procedure

2.1. General overview

This backup procedure must be done by all PMB Operators in case of a problem during calculation process. The Target Time indicated in the table is the Latest Time by which the PMB Operator has to start performing a backup action.
