# 1. Introduction

This procedure describes the process of the Preliminary Confirmation of the Results. After receiving all the Results (the trigger to start this process), [REDACTED].  
 [REDACTED]. After all the Operational NEMOs have sent their positive Preliminary Confirmations, the PMB Coordinator sends the positive Global Preliminary Confirmation, which ends the process.

PCR in blue / Own PMB Operator in green

## 1.1. Summary

The purpose of this procedure is to describe the part of the Market Coupling process that starts when the Results are distributed by the PMB Coordinator to every PMB Operator and ends with the Global Preliminary Confirmation file received by every PMB. The steps are the following:

- Each Operational NEMO [REDACTED] to validate the Results received from the PMB Coordinator.
- PMB Operator has to send [REDACTED] a Preliminary Confirmation file (positive or negative) for the Preliminary Confirmation of the Results.

Once the PMB Coordinator has received all the Preliminary Confirmations of the Results from all the NEMO IT Systems, it sends out to all PMBs the Global Preliminary Confirmation message and the procedure ends.

This procedure describes the reasons for rejecting the preliminary results. Furthermore, it will set the timing requirements for this process.

## 1.2. Governed / Regulated by

-All NEMO Day Ahead Operational Agreement

[REDACTED]

### 1.3. Associated procedures

**- In normal situation:**

- ANDOA\_NOR\_05: Results Sharing and Receiving. The previous process must have been successfully completed.
- ANDOA\_NOR\_07: Final Confirmation of the Results. When ANDOA\_NOR\_06 is successfully completed, the PMB automatically continues to the next step: Final Confirmation of the Results;

**- In backup situation:**

As soon as an event happens that prevents the normal performance of a process, the PMB Operators refer to ANDOA\_BUP\_06.

## 2. Procedure

### 2.1. Preconditions to start

The precondition to start this process is the end of procedure *ANDOA\_NOR\_05: Sharing Results*, in which all the calculations (the PMB Coordinator's one and the shadow one) have ended:
