

All NEMO Committee Press Release: 2nd October 2026

The All NEMO Committee hosted its fourth Annual Conference in Brussels on 29th September 2026

The All NEMO Committee hosted its fourth Annual Conference in Brussels, bringing together policymakers, the European Commission, ACER, regulators, Nominated Electricity Market Operators, Transmission System Operators, market participants and industry experts to discuss recent achievements and future priorities for the development of Europe's Internal Electricity Market.

The conference highlighted major milestones in market integration, including the successful implementation of the Single Day-Ahead Coupling (SDAC) 15-minute Market Time Unit (MTU) which celebrated its 1st anniversary, ongoing enhancements of the Single Intraday Coupling (SIDC), and the evolving regulatory framework needed to support an increasingly integrated, flexible and decarbonised European power system.

The event gathered key representatives from across Europe, fostering a constructive dialogue on the continued development of efficient, transparent and integrated electricity markets.

Opening the conference, **Rafael Gómez-Elvira González**, Chair of the All NEMO Committee, highlighted the European market coupling achievements and underlined the importance of preserving a stable and well-functioning regulatory framework that supports further market integration, security of supply and the integration of renewable energy sources. In the keynote speech the European Commission reiterated that Market coupling is an achievement that we can be proud of.

A central feature of this year's conference was a high-level policy discussion on the successful delivery of the 15-minute MTU in SDAC and SIDC, one of the most significant recent milestones in European market coupling. Representatives from European institutions, regulators, market operators and market participants explored the benefits already achieved and discussed priorities for future evolutions of the European electricity market being the largest and most integrated electricity market in the world' as referred to by ACER.

Two constructive panels moderated by Nominated Electricity Market Operators allowed the stakeholders to examine how integrated electricity markets continue to contribute to efficient price formation, security of supply and the integration of increasing shares of renewable energy and flexibility resources. Participants also exchanged views on how market arrangements can continue to deliver value for consumers while supporting Europe's energy transition and electrification objectives.

Key findings from the All NEMO Committee's 2025 Annual Report highlighted the continued stable performance and development of SDAC and SIDC, as well as the contribution of market coupling mechanisms to the efficient functioning of Europe's wholesale electricity markets. NEMOs reported that 2025 operational robustness in Single Day Ahead Coupling market coupling sessions was of very high standards with 100% success rate.

The afternoon panel session focused on opportunities, challenges and prospects for deeper market integration. Stakeholders discussed remaining gaps in the market coupling framework, and the importance of continued cooperation among regulators, NEMOs, system operators and market participants to support the next phase of European electricity market integration.

In his closing remarks, **Ondrej Maca**, Intraday NEMO MCSC Co-chair, emphasised the important role played by NEMOs in delivering reliable and efficient market coupling solutions across Europe. He highlighted the successful implementation of the 15-minute MTU as an example of what can be achieved through close European cooperation and underlined the importance of continued collaboration among all stakeholders to advance the objectives of the Internal Energy Market.

The All NEMO Committee would like to thank the European Commission, ACER, NRAs and all the speakers and moderators for the high-level of engagement, the diversity of perspectives and the quality of discussions that showed the importance of coming together to share knowledge and drive progress.

All event details can be found on the [conference information page](#).

About All NEMO Committee:

The All NEMO Committee facilitates the cooperation among NEMOs for all common European tasks necessary for the efficient and secure design, implementation and operation of single day-ahead and intraday coupling. The All NEMO Committee is formed by the appointed representatives of each NEMO.
